 **WARNING**

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application including consequences of any failure, and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

**Offer of Sale**

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated on the separate page of this document entitled "Offer of Sale".

### P1P Compact Cylinder according to ISO 21287

The P1P Series is a complete range of ISO 21287 compact cylinders developed to meet the highest requirements for quality and performance. The careful design in every detail provides first class function and service life properties.

#### Features

- ISO 21287 conformity and global availability throughout the worldwide Parker Hannifin organization.
- Bore sizes 20, 25, 32, 40, 50, 63, 80 and 100mm.
- One of the widest ranges of sizes and versions for a broad range of applications.
- Corrosion resistant design with end covers and barrel in anodised aluminium and stainless steel piston rod.
- Long service life thanks to proven high quality materials, surfaces and seal technology.
- Compact design and many installation alternatives for flexible use in narrow spaces.
- Efficient elastic cushioning absorbing residual energy facilitates high speeds and short cycle times.
- Smooth, low noise operation thanks to elastic material in end faces of the piston.
- Flush, drop in global P8S-G sensors on all side faces for flexible and compact assembly and mechanical protection of the sensors.
- P1P is suitable for processing, packaging and handling applications within the food industry thanks to the food approved grease used for the initial greasing.

### High quality

Reliability and long service life are key qualities of any pneumatic cylinder. Therefore we have given P1P highest possible quality in every detail based on our 40 years of experience and extensive testing. The design is based on the following important principles.

- Proven seal design and materials throughout the cylinder. The expertise for seal technology within Parker Hannifin is the basis for leading and proven tribology solutions for all our pneumatic actuators.
- Body extrusion in anodised aluminium with extra fine and hard internal surface for optimum operational conditions.
- End covers and body extrusion with external anodisation for excellent corrosion resistance.
- Stainless steel piston rod for versatile use in corrosive environment.

### Compact dimensions for versatile use

The very compact axial dimensions makes it possible to use the P1P cylinders in a broad range of applications. Note that the P1P cylinders are up to 50% shorter than ISO 15552 cylinders for the same stroke length. This is highly valuable in narrow spaces in machines or production lines. The P1P range is a truly versatile cylinder family.

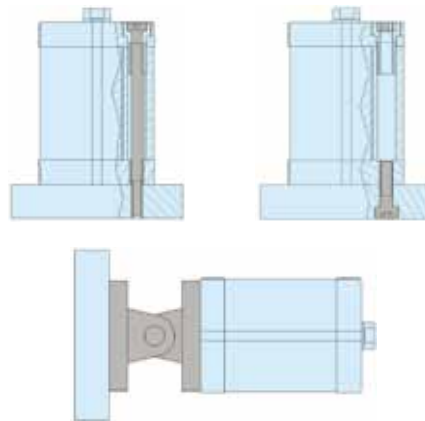

**Flexible installation**

The new P1P compact cylinder range offers many opportunities for mechanical installation.

- There are holes through the cylinder body. Use these to fix the cylinder with through bolts into threads in the surface behind the cylinder.
- In each end of the same through holes there are female threads. These can be used for flange mounting of the actuator from the rear or front face.
- The wide range of ISO 15552 cylinder mountings are available for use with P1P cylinders bore 20-100 mm. Examples are the foot and flange mountings, as well as MP2 and MP4 mountings for articulated applications.

**Global drop-in P8S-G sensor range**

The global sensor range P8S-G fits P1P as well as most of our pneumatic cylinder families. This simplifies your ordering, stock and overall service of sensors.

The P8S-G sensors has a drop-in mounting into the sensor grooves facilitating the assembly and commissioning work. There are sensor grooves on all four side faces for maximum flexibility and adaptation to each application.

The wide range of P8S-G sensors includes both reed and solid state sensors, flying lead versions with 3 and 10 meter cable and pig tail versions with M8 and M12 connector.

### General technical data

Product type	Compact cylinder according to ISO 21287	
Bore size	20 - 100 mm	
Stroke length	1 - 500 mm	
Versions	P1PS...DS	Double acting
	P1PG...DS	Double acting with non rotating piston rod
	P1PS...SS	Single acting: Spring return (Bores 20 - 63mm)
	P1PS...TS	Single acting: Spring extended (Bores 20 - 63mm)
	P1PS...KS	Through piston rod
	P1PS...DF	High temperature
	P1PS...DL	Low temperature
Cushioning	Elastic cushioning	
Position sensing	Proximity sensor	
Installation	Direct	Through holes Female thread on front and rear end face
	Accessories	Cylinder and piston rod mountings
Mounting position	Any	

### Operating and environmental data

Operating medium	For best possible service life and trouble-free operation it is recommended to use dry, filtered compressed air to ISO 8573-1:2010 quality class 3.4.3. This specifies a dew point of +3°C for indoor operation (a lower dew point should be selected for minus temperature operation and we recommend the use of an inline dryer) and is in line with the air quality from most standard compressors with a standard filter.	
Operating pressure	0.5 bar to 10 bar	
Ambient temperature	Standard version	-20°C to +80°C
	High temperature	-10°C to +120°C
	Low temperature	-40°C to +80°C
Pre-lubricated	Further lubrication is normally not necessary. If additional lubrication is introduced it must be continued.	
Corrosion resistance	High resistance to corrosion and chemicals. Materials and surface treatment have been selected for industrial applications where solvents and detergents are frequently used.	

### Material specification

Pos	Part	Specification	
1	End covers	Anodised aluminium	
2	Cylinder barrel	Anodised aluminium	
3	Piston rod	Stainless steel, DIN X 10 CrNiS 18 9	
4	End cover screws	Zinc plated steel	
5	Piston rod seal	Standard	Polyurethane (PUR)
		High temperature	Fluorocarbon rubber (FPM)
		Low temperature	Polyurethane (PUR)
6	Piston / piston seal	Standard	Aluminium / Nitrile rubber (NBR)
		High temperature	Aluminium / Hydrogenated nitrile rubber (HNBR)
		Low temperature	Aluminium / Nitrile rubber (NBR)
7	Piston rod bearing	Multilayer PTFE/steel	
8	Magnet	Plastic coated magnetic material	
	Note on materials	RoHS compliant	

## Cylinder forces, double acting variants

Cylinder bore mm	Stroke	Bore mm	Piston rod mm	Area cm <sup>2</sup>	Max theoretical force in N (bar)

### Selecting Pneumatic System Components

**Cylinder to Valve:** The below chart contains recommendations for selecting air valve products based on 5.5 bar with a 0.35 bar pressure drop. The values within the chart show the corresponding Cv values.

#### Moduflex Valve System

- Stand-alone valves, short-build valve manifold, or large valve manifold configurations available
- Cv range from 0.18 – 0.80
- Peripheral modules available— flow control, pressure regulation, P.O. check valves and vacuum generators

	20	25	32	40	50	63	80	100
50	0.01	0.02	0.03	0.04	0.06	0.10	0.16	0.26

#### Micro / ISO Valve System

- Isys Micro Cv range 0.30 – 0.35
- IsysNet system fieldbus, Turck system fieldbus, 25 pin D-sub, or low cost Moduflex fieldbus options available
- Isys ISO offers 5 sizes with Cv range 0.55 – 6.0

Order Code Key

Standard stroke length

\* Standard stroke lengths in mm according to ISO 4393

\*\* Max stroke 500 mm

### Double acting

The versatile high quality ISO compact cylinder range, P1P cylinders are up to 50% shorter than ISO1552 cylinders for the same stroke. Suitable for a wide range of applications.

- Bore 20 - 100 mm
- ISO 21287 conformity
- Corrosion resistant design and low weight construction
- Magnetic piston as standard
- Elastic cushioning
- Flexible direct mounting
- ISO 15552 mountings and global sensor range common with P1D

### Double acting - Female threaded piston rod

## Compact ISO Cylinders - P1P Series

### Double acting - Guided

This cylinder version feature twin guide rods connected to the piston rod by a large flange plate. These cylinders are ideal for clamping an moving applications where turning of the piston rod must be avoided.

## Compact ISO Cylinders - P1P Series

### Single acting

Single acting P1P cylinders are available in bore sizes 20 - 63 mm and in two versions to suit a wide range of applications. Choose between the spring return (SS) and the spring extended (TS) versions.

#### Sensors

For sensors see page 25.

## Compact ISO Cylinders - P1P Series

### Double acting - Through piston rod

The P1P through rod cylinder version is available in bore sizes 20 - 100 mm.

This cylinder type is used in many ways e.g. in applications with higher lateral forces or when performing a movement on both sides of the cylinder.

### Double acting - Through piston rod - Female threaded piston rod

## Compact ISO Cylinders - P1P Series

### Double acting - High temperature

Use this P1P cylinder version, available in bore sizes 20 - 100 mm, for high temperature applications with temperatures up to +120°C. The chemical resistance thanks to the design in anodised aluminium is an advantage in many high temperature applications. High temperature cylinders cannot be fitted with sensors (the magnetic field strength in high temperatures is too low to ensure correct reliable sensor function).

### Double acting - High temperature - Female threaded piston rod

## Compact ISO Cylinders - P1P Series

### Double acting - Low temperature

This P1P cylinder version is developed for use in temperatures down to -40°C.

It is available in bore sizes 20 - 100 mm.

With the combination of compactness and corrosion resistance the P1P low temperature version can be used in many industries e.g.

Bus, Truck and Rail applications.

# Compact ISO Cylinders - P1P Series

## Cylinder mountings

### Flange MF1/MF2

Intended for fixed mounting of cylinder. Flange can be fitted to front- or rear end-plates of cylinder.

Materials  
 Flange: Surface-treated steel  
 Mounting screws according to DIN 6912: Zinc-plated steel 8.8

Supplied complete with mounting screws for attachment to cylinder.

Cyl. bore	d1	FB	TG1	E	R	MF	TF	UF	I1	W	ZF*	ZB*

### Foot brackets MS1

Intended for fixed mounting of cylinder. Angle bracket can be fitted to front- and rear end-plates of cylinder.

Materials  
 Foot bracket: Surface-treated steel  
 Mounting screws according to DIN 912:  
 Zinc-plated steel 8.8

Supplied in pairs with mounting screws for attachment to cylinder.

**Cylinder mountings**

**Pivot bracket with rigid bearing AB7**

Intended for flexible mounting of cylinder. The pivot bracket can be combined with clevis bracket MP2.

Materials  
 Pivot bracket: Surface-treated aluminium, black  
 Bearing: Sintered oil-bronze bushing

Cylinder mountings

Clevis bracket MP4

Intended for flexible mounting of cylinder. Clevis bracket MP4 can be combined with clevis bracket MP2.

Materials  
 Clevis bracket: Surface-treated aluminium, black  
 Mounting screws according to DIN 912: Zinc-plated steel 8.8

Supplied complete with mounting screws for attachment to cylinder.

Clevis bracket AB6

Intended for flexible mounting of cylinder. Clevis bracket GA can be combined with pivot bracket with swivel bearing, swivel eye bracket and swivel rod eye.

Materials  
 Clevis bracket: Surface-treated aluminium, black  
 Pin: Surface hardened steel  
 Locking pin: Spring steel  
 Circlips according to DIN 471: Spring steel  
 Mounting screws acc. to DIN 912: Zinc-plated steel 8.8

Supplied complete with mounting screws for attachment to cylinder.

**Piston rod mountings**

**Swivel rod eye AP6**

Swivel rod eye for articulated mounting of cylinder. Swivel rod eye can be combined with clevis bracket GA. Maintenance-free.

Materials  
 Swivel rod eye: Zinc-plated steel  
 Swivel bearing according to DIN 648K: Hardened steel

**Stainless steel swivel rod eye AP6**

Stainless-steel swivel rod eye for articulated mounting of cylinder. Swivel rod eye can be combined with clevis bracket GA. Maintenance-free.

Materials  
 Swivel rod eye: Stainless steel  
 Swivel bearing according to DIN 648K: Stainless steel

Use stainless steel nut with stainless steel swivel rod eye.

50 / 63	0,15	<b>P1C-4LRC</b>
80 / 100	0,35	<b>P1C-4MRC</b>

**Stainless steel clevis AP2**

Stainless-steel clevis for articulated mounting of cylinder.

Material  
 Clevis: Stainless steel  
 Pin: Stainless steel  
 Circlips according to DIN 471: Stainless steel

Use stainless steel nut with stainless steel swivel rod eye.

Cyl. bore Ø mm	Weight kg	Order code

### Drop-in sensors

The "drop-in" sensors can easily be installed from the side in the sensor groove, at any position along the piston stroke. The sensors are completely recessed and thus mechanically protected. Choose between electronic or reed sensors and several cable lengths and 8 mm and M12 connectors. The same standard sensors are used for all versions.

Please note that for low temperature applications sensors are normally specified for full performance down to -25°C only. High temperature cylinders do not have a magnetic ring in the piston and therefore cannot be used with sensors.

### Electronic sensors

The electronic sensors are "Solid State", i.e. they have no moving parts at all. They are provided with short-circuit protection and transient protection as standard. The built-in electronics make the sensors suitable for applications with high on and off switching frequency, and where very long service life is required.

### Reed sensors

The sensors are based on proven reed switches, which offer reliable function in many applications. Simple installation, a protected position on the cylinder and clear LED indication are important advantages of this range of sensors.

#### Technical data

Design	GMR (Giant Magnetic Resistance) magneto-resistive function
Installation	From side, down into the sensor groove, so-called drop-in
Outputs	PNP, normally open (also available in NPN design, normally closed, on request)
Voltage range	10-30 VDC 10-18 V DC, ATEX sensor
Ripple	max 10%
Voltage drop	max 2,5 V
Load current	max 100 mA
Internal consumption	max 10 mA
Actuating distance	min 9 mm
Hysteresis	max 1,5 mm
Repeatability accuracy	max 0,2 mm
On/off switching frequency	max 5 kHz
On switching time	max 2 ms
Off switching time	max 2 ms
Encapsulation	IP 67 (EN 60529)
Temperature range	-25 °C to +75 °C -20 °C to +45 °C, ATEX sensor
Indication	LED, yellow
Material housing	PA 12
Material screw	Stainless steel
Cable	PVC or PUR 3x0.25 mm <sup>2</sup> see order code respectively

#### Technical data

Design	Reed element
Mounting	From side, down into the sensor groove, so-called drop-in
Output	Normally open , or normally closed
Voltage range	10-30 V AC/DC or 10-120 V AC/DC 24-230 V AC/DC
Load current	max 500 mA for 10-30 V or max 100 mA for 10-120 V max 30 mA for 24-230 V
Breaking power (resistive)	max 6 W/VA
Actuating distance	min 9 mm
Hysteresis	max 1,5 mm
Repeatability accuracy	0,2 mm
On/off switching frequency	max 400 Hz
On switching time	max 1,5 ms
Off switching time	max 0,5 ms
Encapsulation	IP 67 (EN 60529)
Temperature range	-25 °C to +75 °C
Indication	LED, yellow
Material housing	PA12
Material screw	Stainless steel
Cable	PVC or PUR 3x0.14 mm <sup>2</sup> see order code respectively

# Specifying air quality (purity) in accordance with ISO8573-1:2010, the international standard for Compressed Air Quality

ISO8573-1 is the primary document used from the ISO8573 series as it is this document which specifies the amount of contamination allowed in each cubic metre of compressed air.

ISO8573-1 lists the main contaminants as Solid Particulate, Water and Oil. The purity levels for each contaminant are shown separately in tabular form, however for ease of use, this document combines all three contaminants into one easy to use table.

ISO8573-1:2010 CLASS	Solid Particulate				Water		Oil
	Maximum number of particles per m <sup>3</sup>			Mass Concentration mg/m <sup>3</sup>	Vapour Pressure Dewpoint	Liquid g/m <sup>3</sup>	Total Oil (aerosol liquid and vapour) mg/m <sup>3</sup>
	0,1 - 0,5 micron	0,5 - 1 micron	1 - 5 micron				
0	As specified by the equipment user or supplier and more stringent than Class 1						
1	≤ 20 000	≤ 400	≤ 10	-	≤ -70 °C	-	0,01
2	≤ 400 000	≤ 6 000	≤ 100	-	≤ -40 °C	-	0,1
3	-	≤ 90 000	≤ 1 000	-	≤ -20 °C	-	1
4	-	-	≤ 10 000	-	≤ +3 °C	-	5
5	-	-	≤ 100 000	-	≤ +7 °C	-	-
6	-	-	-	≤ 5	≤ +10 °C	-	-
7	-	-	-	5 - 10	-	≤ 0,5	-
8	-	-	-	-	-	0,5 - 5	-
9	-	-	-	-	-	5 - 10	-
X	-	-	-	> 10	-	> 10	> 10

## Specifying air purity in accordance with ISO8573-1:2010

When specifying the purity of air required, the standard must always be referenced, followed by the purity class selected for each contaminant (a different purity class can be selected for each contamination if required).

An example of how to write an air quality specification is shown below:

### ISO 8573-1:2010 Class 1.2.1

ISO 8573-1:2010 refers to the standard document and its revision, the three digits refer to the purity classifications selected for solid particulate, water and total oil. Selecting an air purity class of 1.2.1 would specify the following air quality when operating at the standard's reference conditions :

#### Class 1 - Particulate

In each cubic metre of compressed air, the particulate count should not exceed 20,000 particles in the 0.1 - 0.5 micron size range, 400 particles in the 0.5 - 1 micron size range and 10 particles in the 1 - 5 micron size range.

#### Class 2 - Water

A pressure dewpoint (PDP) of -40°C or better is required and no liquid water is allowed.

#### Class 1 - Oil

In each cubic metre of compressed air, not more than 0.01mg of oil is allowed. This is a total level for liquid oil, oil aerosol and oil vapour.

## ISO8573-1:2010 Class zero

- **Class 0 does not mean zero contamination.**
- **Class 0 requires the user and the equipment manufacturer to agree contamination levels as part of a written specification.**
- **The agreed contamination levels for a Class 0 specification should be within the measurement capabilities of the test equipment and test methods shown in ISO8573 Pt 2 to Pt 9.**
- **The agreed Class 0 specification must be written on all documentation to be in accordance with the standard.**
- **Stating Class 0 without the agreed specification is meaningless and not in accordance with the standard.**
- **A number of compressor manufacturers claim that the delivered air from their oil-free compressors is in compliance with Class 0.**
- **If the compressor was tested in clean room conditions, the contamination detected at the outlet will be minimal. Should the same compressor now be installed in typical urban environment, the level of contamination will be dependent upon what is drawn into the compressor intake, rendering the Class 0 claim invalid.**
- **A compressor delivering air to Class 0 will still require purification equipment in both the compressor room and at the point of use for the Class 0 purity to be maintained at the application.**
- **Air for critical applications such as breathing, medical, food, etc typically only requires air quality to Class 2.2.1 or Class 2.1.1.**
- **Purification of air to meet a Class 0 specification is only cost effective if carried out at the point of use.**
